

# ELWIS DAYLIGHT H800R

The Elwis Daylight H800R is a powerful and rechargeable LED headlamp capable of delivering an output of 100/300/800 lumens.

Daylight H800R is a next-gen headlamp, equipped with a helmet clip that makes it easy to put on any standard hardhat/helmet. The headlamp is also equipped with a high-quality headband with silicone stripes on the inside.

The lens has an adjustable twist-focus system and three-beam distances, the H800R illuminates 75 meters on the low beam setting, and a full 250 meters on the high beam. The H800R also has a middle beam setting that provides 300 lumens and illuminates 135 meters. In addition, it is equipped with a red night light at the front, as well as a red safety light at the rear. The H800R is charged via the included Type-C USB cable, and a full charge is ready within 5-6 hours. When using the low beam option (100 lumens), the battery life of the H800R will reach 20+ hours.

In addition to the general strength of Daylight, it is also extremely durable and resilient. It can withstand and operate under harsh temperature conditions ranging from -20°C to + 50°C. Furthermore, the headlamp is both water-repellent and impact-resistant to a great extent.

Elwis Daylight H800R is a PRO series product, made from quality components from A-Z.
