

How to compare Frigo Top RT-D with Tonale

Maximum approximate (*) refrigerated load volume at the set temperature ($T_{ext}=30^{\circ}\text{C}$)

Frigo Top RT-D is NOT a “new Tonale” but a completely new and more powerful product.

- (*) Volume depends also on
- quality of the insulation (K [W/m²°C] values)
 - frequency of door openings
 - environmental conditions (real external temperature)
 - additional heat sources (e.g. irradiation)
