KAMASA TOOLS AVIATION

We have designed our tool trolley in collaboration with engineers, technicians and mechanics in the aviation industry. Professionals with decades of experience that match Kamasa Tools' experience in producing the best tools. The trolley contains tools especially selected for service and maintenance of propeller and jet aircraft, as well as helicopters. We have placed major emphasis on providing a complete range of tools of the highest quality, designed expressly for the challenges of the aviation industry.

Kamasu-Tools

IT HAS TO BE RIGHT

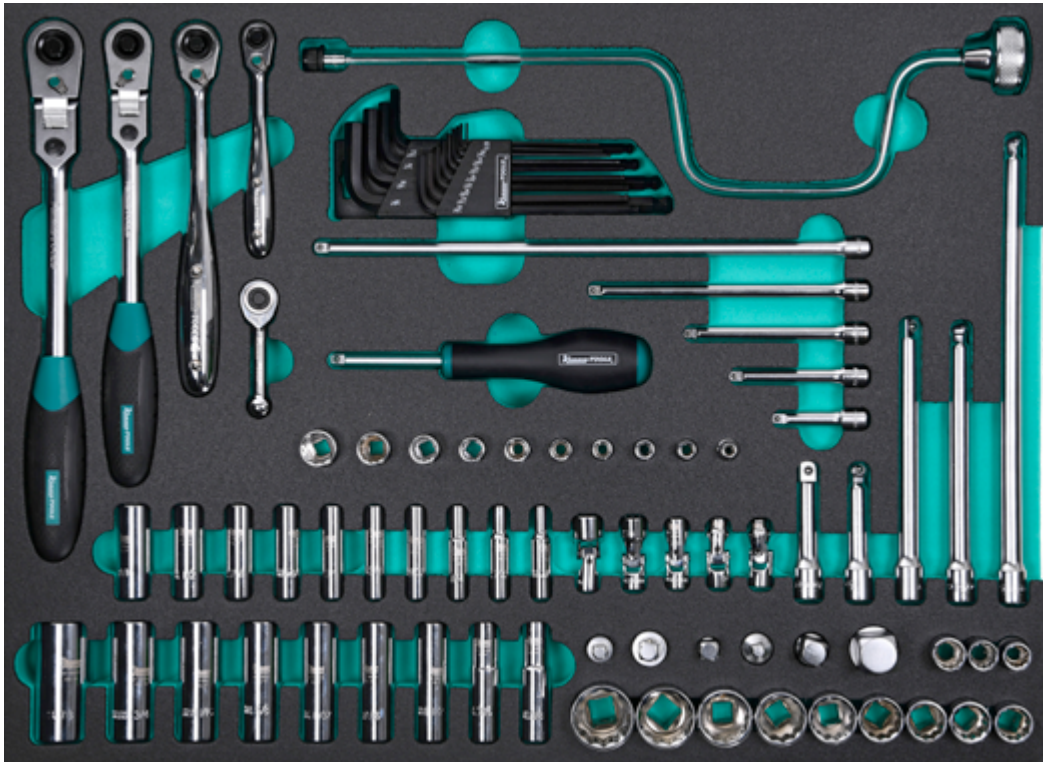

I've been a flight technician for over 40 years, working on everything from small Cessna planes to Boeing 747s. In my profession, nothing is left to chance; it has to be right. It is not like when a warning light lights up in your car and you can pull into the nearest garage.

Every cent counts and you are expected to be as efficient as possible. All the spare parts you install and all the jobs you do can be traced several years back in time. It's equally important to have full control of the tools you use.

I've been involved in developing the Kamasa Tools Aviation tool trolley. It has everything aviation mechanics and technicians need. No more running around to fetch additional tools. All the tools have their own place and you immediately see if anything is missing. The Kamasa Tools Aviation tool trolley is the right choice both for those small airports out in the country and the largest hangars at Heathrow.

Bengt Svedjebrand, aviation technician

AVIATION TOOL SET 1

Contents of aviation tool set K26184

Art. no.	Article	Art. no.	Article
K 4136 D	Ratchet wrench 1/4" close-step	K 11658	Hex key set 0.050-7/32 (+1/4, 5/16, 3/8)
