

Ultra

Abrasive Compound

Product Description

G3 Ultra Abrasive Compound offers unbeatable speed and quality of finish, permanently removing P1500 or finer sanding marks from all modern paint systems.

G3 Ultra is ideally applied using a Farécla G Mop 6" Ultra Yellow Pad (**CFY601**). The pad was engineered in tandem with the compound to provide a marked performance improvement versus other pads. Our product cap and label stripe are also colour coded to match the transfer on the correct pad for ease of identification.

For best results, follow by polishing with G3 Fine Finishing Compound (**G3F101**) and G Mop 6" Red Waffle Pad (**PFR601**). A wipe over with a Farécla Finishing Cloth (**FC-3**) will remove any remaining residue.

Product Information

Size	Code	Ctn Qty
0.6kg	G3U601	12
1.1kg	G3U101	6

Key Benefits

• Fastest Ever Cutting Action	Unbeatable speed to permanently remove P1500 or finer sanding marks
• Permanent Gloss Finish	Provides superb final finish shine in one step for the majority of jobs*. Scratches are permanently removed leaving a superior gloss finish
• Superior Emulsion System	Increased lubrication allows compound to work for longer without drying out
• Clean in Use	Throw off is minimised with surface residue kept lubricated for easy wipe off
• Simple and Easy to Use	Forgiving performance makes excellent results achievable for operatives of all experience levels
• Silicone Free, Low VOC Content and User Safe	Water-based (non-petroleum) formulation is safe in contact with skin

*One step refers to the repair of lighter coloured paints.

Use With

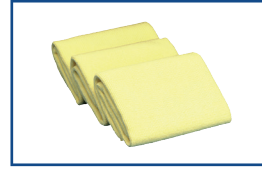

Primary Applicator

G Mop 6" Ultra
Yellow Pad (2 pk)
CFY601

G Mop 6" Back Plate with
White Interface Pad
BPI601 (14mm)
BPI606 (16mm)
BPI612 (5/8")

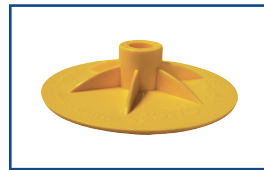

Farécla Finishing
Cloth (3 cloths)
FC-3

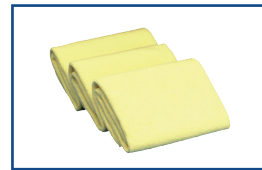

Secondary Applicator

G Mop 6" Ultra
Multi-layer Yellow Pad
CFY606

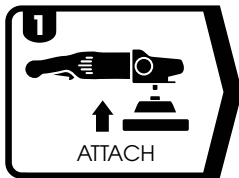

G Mop 6" Advanced
Back Plate
AGM-BP14 (14mm)
AGM-BP58 (5/8")

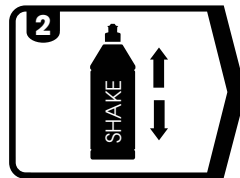

Farécla Finishing
Cloth (3 cloths)
FC-3

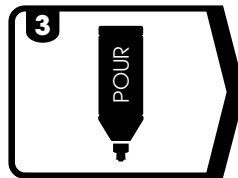

How To Use

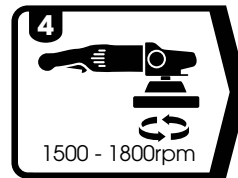

Attach pad to
polishing machine
CFY601
CFY606 (Multi-layer)

Shake bottle well
before use
G3U601 (0.6kg)
G3U101 (1.1kg)

Dispense small
quantity of product
onto surface or
pad

Compound at
1500 - 1800rpm

Wipe clean with
Finishing Cloth
FC-3 (3 x cloths)

Technical Information

Appearance: **White coloured liquid**
Viscosity: **Medium - high viscosity**
VOC Content: **24.00% of total product**
Relative Density: **1.10**
pH: **7.8**
Paint Type Compliance: **HS & UHS**

Fluid Dynamic Technology

The unique process by which 2-phase abrasive particles combine and interact with our superior emulsion system to produce optimal performance.
