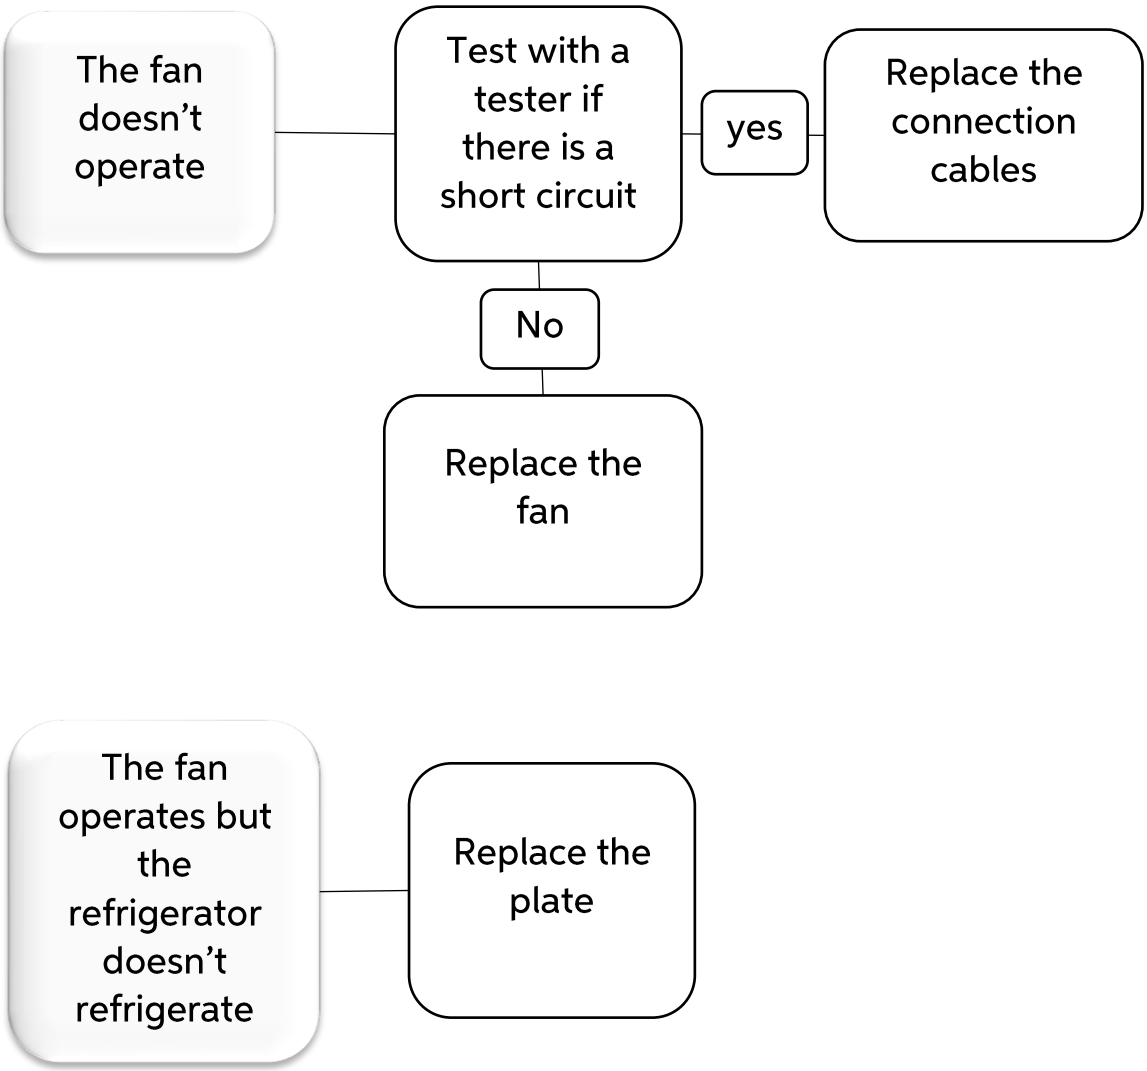
Fig. 1

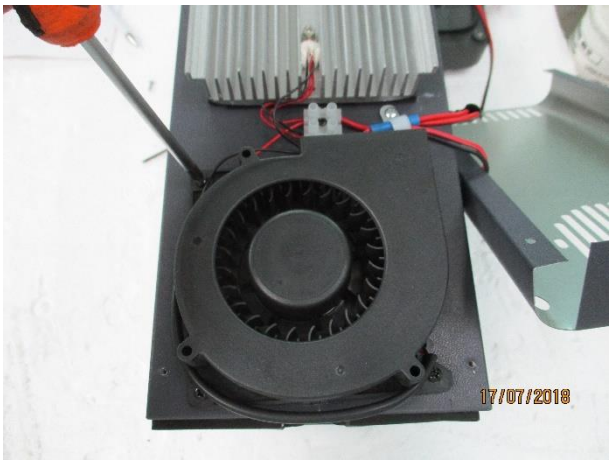
Fig. 2



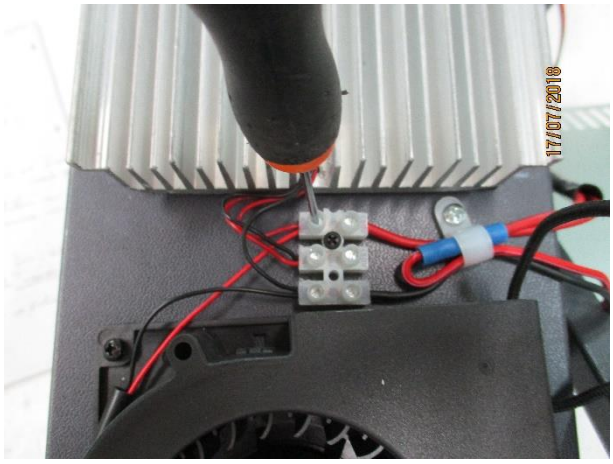
The fan doesn't operate
Test with a tester if there is a short circuit
yes
Replace the connection cables
No
Replace the fan
The fan operates but the refrigerator doesn't refrigerate
Replace the plate

HOW TO REPLACE THE FAN

1. Unscrew the metallic carter (2 bolts)

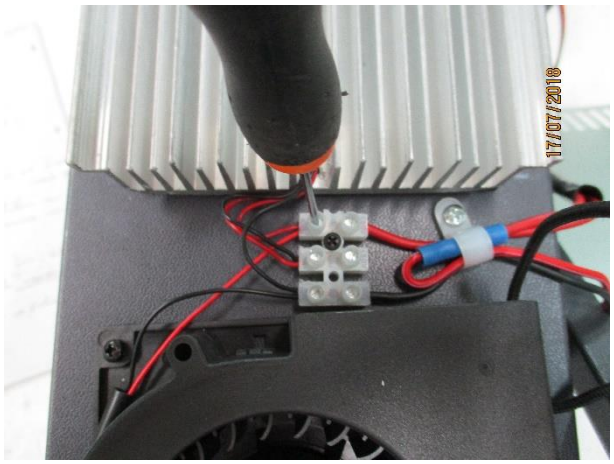


2. Unscrew the 3 bolts fixing the fan



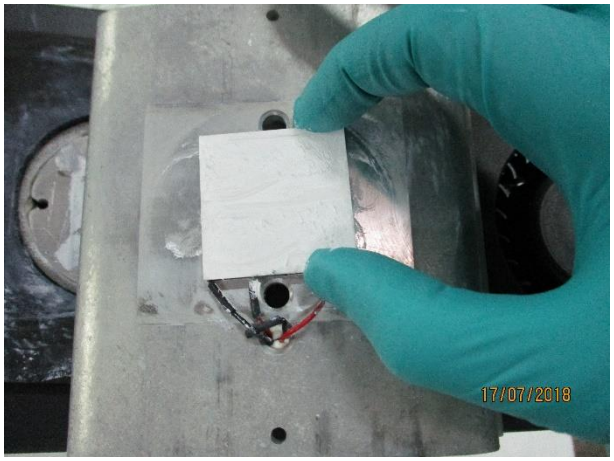
3. Unscrew the bolts fixing the fan wires and then disconnect the wires

HOW TO REPLACE THE PLATE

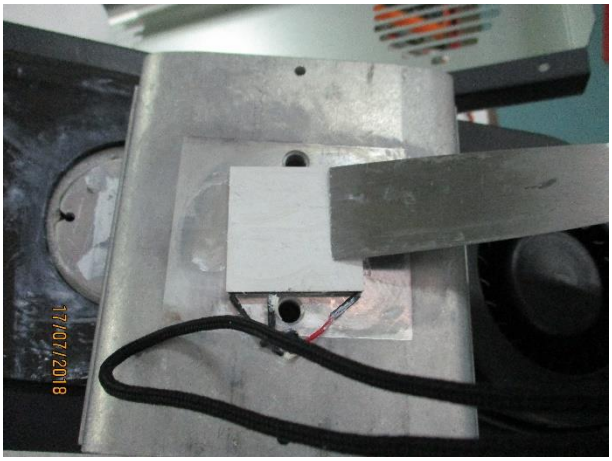


1. Disconnect all the plate's wires

2. Unscrew the heatsink (2 screws)



3. Pull the plate to remove it



4. Spread a thin layer of conductive paste on the new plate, and reverse the procedure to replace it
