

# Thule VeloSlide

The smartest and most user-friendly bike rack for your RV garage space - load up to 2 e-bikes.

## The story

### Take your bikes on your travels

There is nothing better on an RV journey than swapping four wheels for two and exploring the local surroundings. With Thule VeloSlide, you get an ideal rack for transporting up to two e-bikes on your travels, using your RV's garage space to store them securely and protect them from the weather. It's also the perfect solution when you don't want to extend the length of your RV with an external rack at the back - letting you focus on the road ahead with confidence. And what's more, it's extremely easy to use.

### Loading and unloading couldn't be simpler

Thule VeloSlide is designed and built for the ultimate in ease of use and convenience. When loading, the bike rack slides out up to 1.5 meter so you can lift and secure your bike from the outside of your RV without having to bend awkwardly or crawl into the garage space [1]. Then, thanks to the unique, patented and easy-to-grip handle, you can slide your rack into the garage space and automatically lock it securely - all with just one hand [2]. It's the same comfortable, one-handed operation when you want to unload your bike and get in the saddle without any hassle.

But the simplicity and convenience doesn't end there. When attaching your bike or bikes to the rack you can easily optimise the position of each bike, both horizontally and vertically, with simple, intuitive handlings even while the bike is on the rack and with no need for tools [3]. To facilitate easy access to your garage space when the Thule VeloSlide is fully loaded, you can slide the bike rack left or right along its mounting rails, or push it inwards, if you happen to have an opposite access door to the garage [4] [5]. Also, when you want to use the RV garage for something else, you can remove the rack leaving small mounting rails on the floor.

### High-quality design lets you focus on your journey

With the design of Thule VeloSlide, we have a simple goal - giving you peace of mind to enjoy your RV adventures. Thanks to the high-quality design and materials, you can be sure of safe, secure transportation of your valuable e-bikes, not to mention comfortable, intuitive loading and unloading of heavy bikes - even when the bike rack is fully extended by 1.5 meter. The heavy-duty yet stylish rack, bike holders and pump buckle straps can carry two bikes weighing up to 70 kg in total [6].

## USPs

### Carry 2 bikes up to 70 kg

Thule VeloSlide is the ideal solution for carrying e-bikes in your RV garage.

### Ultra-convenient and easy to use

The intuitive, one-handed operation lets you slide the bike rack in and out - with automatic locking/unlocking in position - for the easiest and most secure loading and unloading possible [1] [2].

### Make the best use of your space

Thule VeloSlide is optimized for limited space just by sliding the bike rack along the rails to the side. Even vertical space as larger e-bikes can be hung alongside the frame with the wheels just millimeters off the floor [3]. Easy to uninstall when not in use.
