

AirGuard

Wheel Sensor, tyre pressure control system

The Tesla Bluetooth sensors are installed as standard in Tesla models 3 and Y from November 2020. They are pre-programmed and automatically connect to the vehicle after 20

minutes of travel. The wheel sensors can be used in aluminium and steel rims. The sensors can be ordered individually and are supplied with a valve.

Material: Aluminium
Weight: 46 g
only in connection with: Tesla Bluetooth

Info: with battery
 with valves
 with seal ring
 with box nut
 with screw
 with pressure sensor
 with integrated air
 temperature sensor
