

Elwis PRO Craftsman 1000R

The Elwis PRO Craftsman 1000R is a very powerful COB handlamp. It can provide either 1000 or 500 lumens in output, and produce a light quality of >80 CRI.

The Craftsman is a 360 ° work light solution that, despite its size, is a solid and flexible answer in a lot of cases.

The model can be easily mounted via its built-in magnet, on metallic surfaces. It also has a 360 ° rotation system, so the light can be easily adjusted to the desired angle.

The Craftsman may also be placed to hang with the built-in hook, so the possibilities are many.

The Craftsman has a rechargeable battery that is charged via USB Type-C.

A full charge gives yields a battery life of 3.5 hours, at a low beam performance (500 lumens) while the high beam (1000 lumens) provides approximately 1.5 hours.

In addition, it can be mentioned that it works under harsh temperature conditions, from -10°C and up to + 40°C. It is also dustproof and water-resistant.

Moreover, the lamp weighs in at just 331 grams, making it easily transportable.

Elwis PRO Craftsman 1000R is made of quality components from A-Z.
