

ELWIS PRO SLIM 600

Elwis PRO Slim 600 is a versatile, solid, and rechargeable inspection lamp, where you can easily vary your light output if necessary.

The model has 3 different lumen settings on resp. 600, 300, and 100 lumens. In relation to the battery life, the different settings will mean varying lifetimes of resp. 2.4 and 9 hours battery. A full charge is ready in 4 hours.

The Slim 600, however, is particularly notable for being able to illuminate hard-to-reach areas, as it can be "bent" 180°. The possibility to fold the Slim 600, adds a practical dimension to the overall performance of the inspection lamp.

The Slim 600 can be used handheld or hands-free, depending on the user requirements. Mounting is possible when utilizing the built-in hook. The model is well balanced and weighs 270 grams.

The Slim 600 has a built-in magnet, so it can be easily placed and mounted on magnetic surfaces, where it can also be adjusted so that the angle fits perfectly under any circumstances. The model also has a CRI quality of >80, which gives the individual user a comfortable and natural light, of high quality.

The Slim 600 also has an IK and IP classification of IK07 / IP65, which helps to emphasize its durability. Moreover, it is completely dustproof and extremely water-repellent. The Slim 600 is also fully operational under demanding temperature conditions from -10 ° C and up + 40 ° C.

The Model utilizes a USB Type-C charger.

Elwis PRO Slim 600 is made of quality components from A-Z.
